

WE ARE ECO-UNESCO

We are Ireland's leading environmental education youth organisation. Through our wide range of programmes and services, we inspire, educate, empower and support young people to take positive environmental action.

OUR IMPACT:

+15,000

young people worked
with last year

+ 60,000

young people participated in our Young
Environmentalists Awards since 1999

+17,500

followers on
social media

+ 35 years

experience working
in environmental
education

OUR EXPERTS DESIGN OUR WORKSHOPS TO

- Support the school curriculum (Junior Cycle – CSPE, Geography, Science, Business Studies; Senior Cycle – Politics & Society, Economics, Geography)
- Offer an excellent platform for CSPE Action projects and TV.
- Promote personal development.
- Compliment environmental education initiatives.
- Include recent and relevant information and provide expert knowledge.
- Link with the Sustainable Development Goals (SDGs).
- Engage and empower participants with solution-based activities.

**ONLINE &
IN-PERSON
WORKSHOPS
AVAILABLE**

WORKSHOPS STRUCTURE

- 80 to 120 minutes in duration, catered to suit your needs.
- Tailored to young people 10-18 years of age.
- Adaptable to your learning objectives.
- In-person workshops are suitable for a maximum of 30 participants.

ECO-UNESCO ENVIRONMENTAL WORKSHOPS

CLIMATE ACTION

This workshop examines the main causes and impacts of climate change, and provides a deeper understanding of the current climate situation. We focus on positive actions we can take as both individuals and a community to combat climate change and call for climate action.

FASHION FOCUS

This workshop explores unsustainable production and consumption of fashion and examines how the fashion industry contributes to environmental and social issues. We assess ways which we can help to create a more sustainable and ethical fashion forward strategy.

WASTE WARRIORS

This workshop opens our eyes to the waste we often forget about - food, water, energy and resources. It allows us to perform a 'self-audit' to understand what waste we contribute to the most and positive actions we can take to reduce our consumption levels.

CLIMATE JUSTICE

Climate change does not affect everyone equally. Climate change is not just an environmental issue, but also a social, ethical and human rights issue. In this workshop, we explore how we can advocate for climate justice and a just transition as individuals and in our community.

PLASTIC PATROL

In this workshop we explore the good and the bad sides of modern plastics, and the impact which plastic production and pollution has on the environment, wildlife and humans. We discuss positive actions to reduce our plastic dependency at both an individual and community level.

EXPLORING ECOLOGY & BIODIVERSITY

This workshop explores how all living things are interconnected and how biodiversity is important for healthy environments and human health. We explore the impact which we can have on biodiversity and discuss some of the positive solutions we can take to protect biodiversity on a local and global level.

6-STEPS-TO SUCCESS

This workshop is one of our most sought-after workshops. It introduces participants to project planning, and helps them gain confidence to conduct environmental projects in their school, community, or as part of the Young Environmentalist Awards.

FOOD FOR FUTURE

This workshop takes a deep dive into current food production systems and the huge impact they have on our environment, waste, and sustainable development. We discuss possible actions to help create a more sustainable food system and positive changes we can make.

CLIMATE CAMPAIGNING

Want to get involved in climate action but don't know where to start? This workshop gives a complete guide to youth climate activism such as writing to our TD's, climate campaigning, environmental actions and tips to help manage climate anxiety.

MORE TRAININGS AND WORKSHOPS

TRANSITION YEAR SUSTAINABLE DEVELOPMENT PROGRAMME

This 6 or 12 module course is based on education for sustainable development (ESD) and gives TY students an opportunity to explore different areas of sustainable development in more detail. We focus on both social and environmental sustainability, encourage the students to think critically and to assess their own habits, and gain confidence in voicing their opinions on sustainability issues.

STUDENT COUNCIL TRAINING

This 3-hour training session offers a motivational space for the student council to think critically on how their school can improve their contribution to sustainable development. We will also explore the necessary skills to perform a school sustainability audit, discuss good project management and start brainstorming on ways the student council can implement sustainable changes during their term.

ECO-ACADEMY – BRINGS ENVIRONMENTAL EDUCATION TO YOU!

Available on mobile, tablet and computer you can also access our workshops at any time on the ECO-UNESCO ECO-Academy. Courses can be completed at your own pace, are self-led and brings sustainable development education at a time and place that suits you. Visit our website to explore our wide range of courses learn.ecounesco.ie
